Tariff of charges

Savings Accounts

This leaflet provides details of Principality Building Society's tariff of charges for Savings Accounts.

The charges we make relate to the operation of savings accounts and reflect the expenses and costs that we incur and in respect of service charges also reflect that we are providing a service.

Our fees and charges are variable. For more details on how and when they may be varied please refer to our Savings Terms and Conditions.

We will tell you about any changes either by general notice in our branches or through our Customer Support Centre, together with advertisements in one or more newspapers of our choice, or by letter or other personal notice. Revised details of charges will also be sent to you with your annual statements.

Where fees are described as Service Charges, the level of those charges reflects the fact that we are providing you with a service. Other Charges are set at a level to cover the cost to us of having to pursue the action or activity described. This will include a proportionate amount of general overheads.
